# Executive Summary

## Offering Summary

Matthews™ Healthcare Division is pleased to offer the opportunity to acquire a Class A, 11,000 square foot single-tenant outpatient medical property leased to Lehigh Valley Physician Group. The lease is backed by a full corporate guarantee from Lehigh Valley Health Network, Inc., a premier health system with over 125 years of operating history. On August 1st, 2024, Lehigh Valley Health Network completed its merger with Jefferson Health, forming a major regional academic health system serving Pennsylvania and New Jersey, creating a system with 32 hospitals, over 700 care sites, and approximately 62,000 employees. Lehigh Valley Health Network now operates as part of the larger Jefferson Health system, whose credit ratings are “A” from S&P Global.

The property is occupied under an absolute net lease that provides for 2.5% annual rental escalators. Under the lease terms, the tenant is responsible for paying all operating costs directly, including taxes, utilities, and insurance. While the landlord may fund certain capital expenditures, the tenant is required to reimburse these costs via amortized “Capital Replacement Payments” as additional rent for the duration of the term. The facility serves as an outpatient facility offering physicals, vaccinations, asthma counseling, nutrition counseling, diabetes education, and same-day risk appointments.

The property is situated on a 0.65-acre site at 141 N Vine St, Hazleton, PA. It is located within the larger Wilkes-Barre-Hazleton MSA, which encompasses a population of 574,000 people, with roughly 20% of the population being aged 65 years or older.

## Why this is Important for Investors

Straight line depreciation allows investors to deduct the cost of a commercial property evenly over a 39 year period, creating a consistent annual tax shelter that reduces taxable income without affecting cash flow.

A cost segregation analysis enhances this benefit by identifying portions of the property such as mechanical systems, electrical, plumbing, and site improvements that can be depreciated over shorter lives, typically 5 or 15 years.

By accelerating depreciation into the early years of ownership, cost segregation can materially increase near term tax deductions and tax savings, improving after tax cash flow and overall investment returns. For many investors, especially those with significant taxable income, cost segregation can meaningfully enhance the economics of an acquisition compared to straight line depreciation alone.
