## Property Highlights

- **Established Turnkey Collision Repair Business**

CARSTAR Collision Masters operates as a fully functioning collision repair facility with an established operating history, trained staff, equipment, and an existing customer base. A buyer can step into a business that is already producing revenue and serving the local market without the significant startup costs, construction timelines, permitting challenges, and marketing efforts typically required to launch a new collision repair operation. The existing systems, operational processes, and reputation within the community provide a strong foundation for continued operations and future growth.

- **Real Estate Included Creating Long Term Asset Value**

The offering includes both the operating business and the underlying real estate, creating a unique opportunity for a buyer to control the physical location of the operation while building equity in the property. Many collision repair businesses operate under long term leases, exposing owners to rent increases or relocation risks. Ownership of the real estate eliminates these concerns while providing an appreciating asset that can be leveraged for financing, held for long term investment, or potentially redeveloped in the future. This structure also provides flexibility for future owners to lease the facility to an operator if desired.

- **Strategic Location Near a Major Military Installation**

The facility is located in St. Robert, Missouri, immediately adjacent to Fort Leonard Wood, one of the United States Army's largest and most active training installations. The base supports a substantial and continually renewing population of military personnel, civilian employees, contractors, and family members. This population generates ongoing demand for automotive services, including collision repair, as thousands of vehicles move through the area each year. The constant turnover of military personnel also creates a recurring influx of new residents and potential customers.
